

## USIT 6P4 Principles of Geographic Information Systems Practical #9

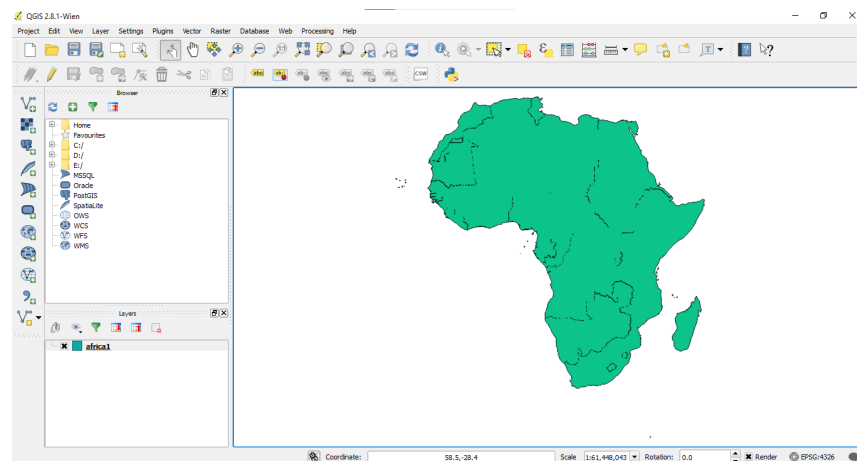

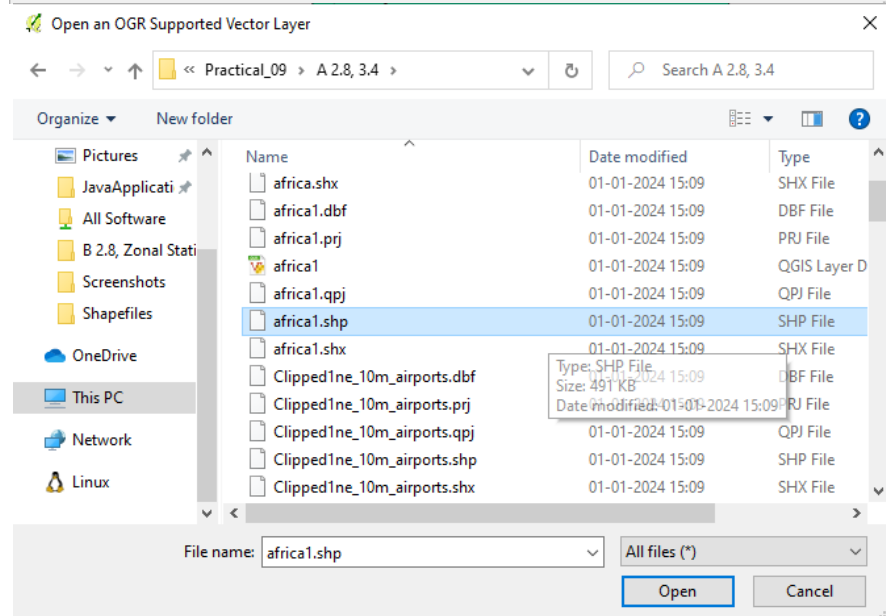

Name	Sanjeev Gupta	Roll Number	21302Boo23
Class	TY BSC IT	Division	C
Subject/Course	USIT 6P4 Principles of Geographic Information Systems		
Topic	Advance GIS Operations 2: Batch Processing using Processing Framework Automating Complex Workflows using Processing Modeller Automating Map Creation with Print Composer Atlas		

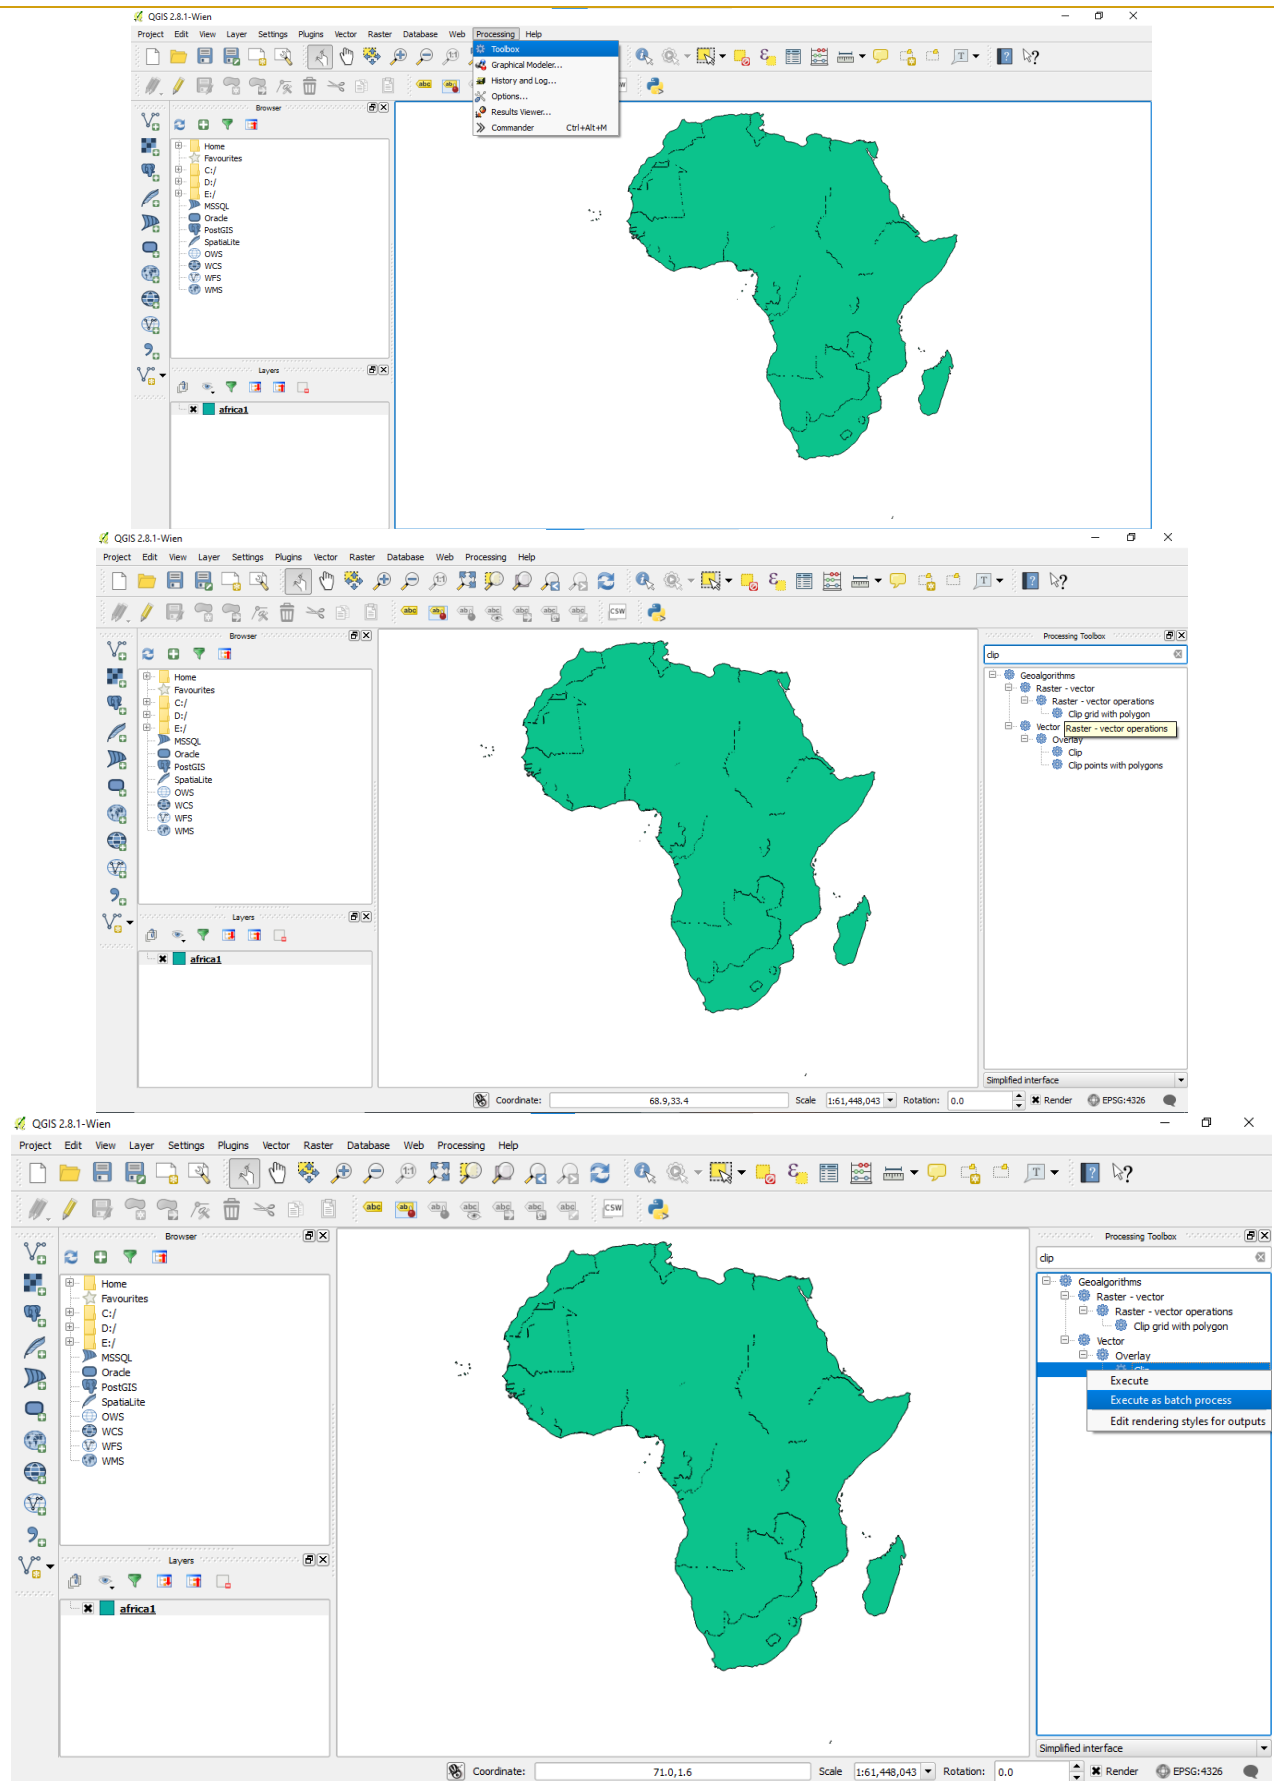

### Explain about Batch Processing using Processing Framework.

The Processing Framework in QGIS provides an environment within QGIS to run native and third-party algorithms for processing data. It contains a nice batch processing interface that allows one to execute an algorithm on several layers easily.

### Batch Processing using Processing Framework. [Write steps and insert Screenshot]
